Joint Colleges of Science Representatives' Report

Shriyutha Vaka and Oliver Hervir

National Science Week

National Science Week was a huge success, and we are extremely proud of the turn-out that we had. Since the last meeting, our efforts have been primarily focused on National Science Week (which was held in Week 4). We organised grant funding that was distributed to Science Society to be used in collaboration with other societies. The events that we were directly responsible for were a Liquid Nitrogen Ice-Cream Stall as part of Science Mayhem, a Science Communication panel event, organised by STEM Student Carolina Pardo, and ANUSA Universal Lunch Hour.

We would like to send our heartfelt thanks to the Research School of Chemistry and the Centre for the Public Awareness of Science for their significant involvement and support during that week. We would also like to express our gratitude to the Science Society for their significant assistance during National Science Week.

Academic

At the time of writing this report, we are yet to meet with Anna at our monthly coffee catchups, and thus, have nothing to report on in this aspect. At this stage our efforts are focused on preparing the handover to the next JCOS representatives, as we reach the final months of our term.

Upcoming

The outgoing 2022 JCOS representatives, and the incoming 2023 JCOS representatives will be hosting the Universal Lunch Hour in Week 10.
